PHONE FEATURES

Introducing the GSP-1700, the smallest, lightest satellite handset from Globalstar. Its convenient size and increased functionality makes it a must have communication tool wherever your business or leisure pursuits take you.

The Globalstar GSP-1700 phone is designed to take you beyond cellular and landline communication, making you more productive and keeping you in contact with work, friends and family from afar. New ergonomic redesign, advanced feature set and reduced size make the GSP-1700 an indispensable tool for business and a must have on your back country trips.

SPECIFICATIONS

The GSP-1700 is the smallest and lightest satellite phone from Globalstar. The new ergonomic design makes this handset convenient for keeping in contact from remote locations.

The Globalstar phone offers an ergonomic design that makes it comfortable for hand-held operation. The phone measures 225cc in total volume and weighs 200 grams (including battery). **The height is 135 mm, the width is 55 mm and the thickness is 37 mm.** The antenna, when held in a vertical position, communicates with the Globalstar satellite at elevations more than 10 degrees above the horizon. The Globalstar antenna rotates and stows into the handset for convenience when not in use.

COMPONENT	OPERATIONAL	NON-OPERATIONAL
Phone	-20 to +55°C (-4 to +131°F)	-30 to +60°C (-22 to +140°F)
Vocoder	8k variable rate vocoder for Globalstar mode	
Frequency Range (channel center frequency)	Globalstar Transmit: 1610.73 to 1620.57 MHz Globalstar Receive: 2484.39 to 2499.15 MHz	
Technology	Globalstar Satellite Mode (CDMA)	
Talk Time/Standby Time:	Normal operation for four (4) hours of talk time (+26 dBm) Ten (10) hours of standby time (no slotted paging)	
	Thirty-six (36) hours of standby time (slotted paging) when not in ring while stow mode	

* All measurements for height and volume include standard battery and assume the Globalstar antenna is stowed.
